Import your images and enhance them with a versatile photo editor. 11-10-2012, 07:18 PM Mac007
PS: Have a look at other reviews, some people say they are not happy with the software. Review: - Support will not reply to emails. - Album has no description, and when you select a cover nothing happens. - Double clicking a photo launches the photo editor without any notice that it is going to do so. - Album create from scratch does not use album layout setting. Summary: I can't recommend this to anyone, not even to free users.Q: Is there a "sorted" way of using a csv file? Here is my code:
import csv
file = csv.reader(open('hello.csv', 'rb'))
for row in file: # do something
So I open the csv file and loop through each row. The rows are sorted by the first column, and I don't know if there is a way of using csv directly for this, because I'm unsure how to make it ignore that. A: So you don't want an.ignore = 0? if so, pass next(f) when calling csv.reader.
import csv
file = csv.reader(open('hello.csv', 'rb'), next = next(f), quotechar = '"', delimiter = ',')
for row in file: # do something
