OS X: How to open password protected rar archives? Extract password-protected archives (a.k.a. password protected rar) easily on your Mac. The program by default will open password rar archives. To open password-protected files on Mac, you just need to specify the password in a simple and convenient way. Add RAR password to Mac Any Archive by archiv With the extension rar, any RAR file (password protected or not) can be opened from the Finder. The RAR file owner can give any password to a RAR file using an RAR password modifier (i.e. “password” or “PASSWORD” in the configuration file). You can use the password modifier to open RAR archives only with the correct password, which is required to extract its contents. Extract password protected rar archives with the best way Password Required to open rar archive on Mac, you are required to change the extension of the rar archive from '.rar' to '.rard' by renaming it. Then you can open it using openarchiver (universal application) with the password required to open it. Save password protected rar files with Mac To save a password-protected archive to the disk you will need to convert the password protected archive to a unpassword protected archive. This is done using the unRAR utility (unregistered version is available at for Mac. The password protected archive will be the output from unRAR. Passwords can be written into a File by password modifier Using an RAR password modifier you can write a password into a file. You can do this when extracting a password protected archive. You need to supply the password to the password modifier. You can find out what password modifier is available for you by typing “rard --help”. Be sure you are using a correct password To get a password from an RAR password modifier you need to know what the password modifier is expecting to see as the Password. The password modifier saves the password if the Password matches the one supplied by the user. Appears in Finder You can get the password protected file and password dictionary for a password-protected RAR archive if you are in Finder. Choose Finder and then choose View In Finder you can choose View -> Show
