This reviewer has installed Photoshop CS5, Adobe InDesign CS5, and DVD Factory Pro 5 on his Windows 7 Lenovo laptop. It is unlikely that we'll get an exhaustive review of these applications, but here are a few things to keep in mind. To recap, this is what the Project panel has to offer:

- Organize, sort, and find images, with options like renaming and moving.
- Edit and manipulate images as necessary.
- Tell what is happening on screen by either displaying the in-camera JPEG preview or providing 16x9 and 4x3 monitor/projector previews.
- Colorize images in a few clicks.
    - Drag and drop four color markers into the areas of the image you want to change.
    - Specify what you want the new colors to be.
  Lightroom 5 supports the following cameras and camera lenses:
    - Canon EOS 1000D / Rebel XSi
    - Canon EOS 7D
    - Canon EOS 70D
    - Canon EOS 5D Mark III
    - Canon F3
    - Nikon D600
    - One-touch lens profile creation for multiple cameras (D60, D3000, D3100, D3200, D5100, D5300, D750, D840)
    - Self-timer controls (Nikon D40x)
  Once the performance issues were fixed, the update was a smooth one. The new release is a substantial update, but it is a much-needed one. It improved the interface, fixed many bugs, and enhanced the overall performance of the cameras. The most noticeable change is the way the camera roll is viewed in the sidebar after importing the image files to the library.
